

Team Supervisor – Natural Resource Management

Details:

- Negotiable start date
- Based in Babinda, working in the Russell River catchment
- Great salary, plus benefits including 9.5% superannuation

About Jaragun:

Jaragun specialises in sustainability and has received Reef Assist funds from the Queensland Government to employ a group of seven Traditional Owners to work in catchment restoration over the next 12 months. The program of works includes weed control, stream bank revegetation and wetland restoration for some of the most environmentally significant areas of the catchment. The project includes working collaboratively with landowners, TropWATER (JCU), QPWS and Cairns Regional Council (CRC) on an agreed set of priorities.

Responsibilities:

- Develop and implement a 12-month schedule to achieve the project's environmental objectives.
- Supervise and support day-to-day coordination of the on-ground team, including developing the skills of Traditional Owners, ensuring compliance with Workplace Health and Safety, overseeing logistics and managing assets.
- Develop and maintain strong relationships with partners.

Relevant experience and qualifications:

- Natural resource management skill set.
- Supervision of small teams.
- Successfully working with Aboriginal people.
- A qualification in a relevant field, such as Conservation and Land Management, Natural Resource Management or the Environment.
- A current C class manual driver's licence.
- Be physically fit and able to pass a medical test.
